

Airl is a positive, encouraging radio station, unlike so many others currently broadcasting. I am personally affected every day by the service that the Airl FM Radio Station provides. My attitude is much more positive when I listen to their station, and as a result my behavior is more positive than it might otherwise be. I listen to this station constantly, both in my home, at my office, and in my car. I would not listen to the radio anymore if I couldn't listen to Airl. Based on my personal experience of the effects of Airl on my attitude and behavior, I must conclude that others in my community are affected in a similar way. I do not wish to live in a community that does not have this positive encouragement in the form of Airl radio.
